

GC Wannabaves

Ferrule removal tool

This tool helps you getting the ferrule out of the nut.
Part number: 3001-12745 ferrule removal tool.

Leak detector LD229

The **LD-229** Gas Leak Detector is a portable, highly sensitive instrument designed to detect gas leaks in gas chromatography instruments and accessories such as purge and trap system. Gas leaks are indicated with a dual system that consists of an indicator lamp display and a buzzer alarm. The detector is more reliable and convenient compare to the soap solution method for detecting very small gas leaks.

The LD-229 Gas Leak Detector is powered by rechargeable Ni-Cd batteries. A blinking power lamp indicates that the batteries must be recharged with the AC adapter provided. Full battery recharging requires approximately 4 hours. Fully charged, the batteries can be used for approximately 5 hours.

Part number: G300001 Gas Leak Detector LD229

Shortix® Capillary GC Column Cutter

- Consistently make precise, clean, square cuts with a diamond blade.
- Built-in magnifier to verify square cut.
- Use with 0.25mm ID to 0.53mm ID tubing (0.78mm OD maximum).

Part number: A200040 Shortix Column Cutter
